

VOLVO V90
CROSS COUNTRY

INNOVATION FOR PEOPLE.

Made by Sweden.

At Volvo Cars, we continuously innovate in order to make your life better. Every car, every technology and every design is the result of a clear vision – to put people at the heart of everything we do. It's a vision that has driven us from the start, one informed by Sweden, a country which values people as individuals and where conventions are challenged. It's a culture with a rich design heritage and a unique way of looking at the world.

This vision has inspired us to create the likes of the three-point safety belt and side-impact airbags – inventions that have saved lives and changed automotive history. And with our new generation of cars we continue with this tradition.

Scandinavian design combines with modern Swedish luxury to enrich your experience. Intuitive Sensus technology makes life less complicated and keeps you connected with the world, while the latest Drive-E powertrains balance responsive power with class-leading efficiency. And our IntelliSafe innovations support you while you are driving, helping to prevent accidents. They make your journey more comfortable and enjoyable.

We understand what's important to people. It forms the basis of all the innovations which we create. Innovations that improve lives.

At Volvo Cars we design our cars around you.

THE VOLVO

EXPERIENCE | 44

FACTS AND FIGURES | 45

Ever since we came up with the idea of adding go-anywhere capability to the legendary versatility of our estate cars, the Volvo Cross Country has been taking drivers further. To the places they want to reach, the things they want to do, the experiences they want to be part of. And, all the while, we do this by keeping them safe, comfortable and in control.

We've been refining the concept for nearly two decades. Now we've arrived here – this is the new V90 Cross Country. The point at which all that experience meets Volvo's new generation of elegantly versatile estate cars. The result is a car that combines the best of Scandinavian design and craftsmanship with true all-road capability. This is the car that gets you where you want to go.

*"No matter what's going on outside,
the V90 Cross Country is a sanctuary inside."*

GO FURTHER

Your sophisticated adventure awaits.

A car to take on more than the everyday, the V90 Cross Country is a true all-road vehicle. In bad weather, on rough roads and when conditions get tough, you can rely on it.

Elegant and refined, the V90 Cross Country tells the world what it can do and where it can take you. Clean, taut lines and rugged details create a powerful look that conveys a strong sense of capability – with all the practicality of the Volvo estate built in.

The V90 Cross Country is packed with innovative technology that has one purpose—to make your life easier, and one principle—it must be easy to use. The sophisticated chassis is built to cope with road conditions that would stop lesser vehicles and to make tackling those conditions easier for you. No matter what's going on outside, the V90 Cross Country is a sanctuary inside. The spacious, light-filled cabin is made from

the finest materials and constructed with the care and attention provided by Swedish craftsmanship. Designed to make every experience an adventure, it is a place where you can relax in comfort, where technology enhances your journey and makes life easier.

Visible strength. Combining the elegance of our new design language with Cross Country ruggedness has created a car that's sophisticated, tough and practical.

Its large wheels and increased ground clearance (210 mm) give you confidence on any road. The front and rear skid plates blend seamlessly into the bumper for an elegant and rugged look, and the cladding helps to protect the bodywork. Bold lines, the raked rear window and the tall LED tail lights, with their slender vertical shape, are both contemporary and classically Volvo.

DESIGNED FOR CONTROL

Precision and accuracy at every touch.

From the moment you settle into the sculpted driver's seat, you're in control. You sit comfortably in the V90 Cross Country, with the 9-inch centre display with touchscreen angled towards you to create the feeling of a cockpit. You're surrounded by an environment where beautiful materials and advanced technology meet, creating a cabin that looks great and works perfectly. Metal Mesh trim, unique to

the V90 Cross Country, typifies our approach to materials: modern, restrained and good to touch. The exceptional craftsmanship enhances the feeling of precision. The air vents are inspired by our concept cars. With a metal-finish vertical strip and distinctive diamond-pattern surfaces for the control knobs, they are beautiful to look at and a pleasure to use. In the V90 Cross Country,

every component moves with the accuracy afforded by fine engineering. It is a car that gives you control over every part of your journey.

Please note: Some of the information in this brochure may be incorrect due to changes in product specifications that may have occurred since printing. Some of the equipment described or shown may now only be available at extra cost or may no longer be offered. Before ordering, please ask your Volvo Car dealer for the latest information. The manufacturer reserves the right to make changes at any time and without notice to prices, colours, materials, specifications and models.

An air of luxury. The beautiful, comfortable cabin will delight you and your passengers on every journey. The panoramic roof makes the most of the airy feel and Scandinavian design.

"In the V90 Cross Country, technology and convenience go hand in hand."

Light. Space. Luxury.

Travel first class in every seat, every day. Because when you're in the V90 Cross Country you're in your own private lounge, a place where comfort and luxury combine with technology and craftsmanship.

It starts with the front seats. Sculpted to complement the human form, they provide superb support and a huge range of adjustment, so everyone can find the ideal seating position. Ventilation and massage functions provide even greater comfort.

The shape of the backrests increases legroom for passengers in the rear. The rear

seats are designed to cosset and support. The panoramic glass sunroof floods the entire cabin with light. Tinted to prevent glare, the roof opens to create an even more airy feel, and can be closed remotely using the remote control.

At night the cabin glows with the warmth of its interior lighting, welcoming you into the car. The high-level illumination lighting package includes backlit door handles and illuminated tread plates, as well as additional interior lighting that enhances the exclusive ambience.

CleanZone technology means that, in cities and heavy traffic, the air you breathe inside the car is cleaner than the air outside. It filters dust, pollen, particulates and odours while monitoring the air quality and closing the intakes if pollutant levels rise too high. It happens automatically – all you need to do is set the temperature you want and the car does the rest.

In the V90 Cross Country, technology and convenience go hand in hand.

In the driver's seat you're in charge. Control functions such as navigation and entertainment from the steering wheel buttons, while the 12-inch driver display keeps you informed.

Every element of the cabin is crafted to make form and function one. The door handles can be backlit, making them easier to find in the dark.

Beautiful materials such as Metal Mesh complement the car's advanced technology, creating a uniquely contemporary look.

*"The clever design and versatile interior layout
make every day easier."*

READY FOR EVERY ADVENTURE

A car that fits your life – all of it.

Getting you there is just the start. The V90 Cross Country matches its all-road ability with built-in versatility to create a car that can do more.

The clever design and versatile interior layout make every day easier. The shape of the load compartment makes it easy to fit in awkwardly shaped objects, and the rear seats fold at the touch of a button to create a longer, completely flat load space. You can do this from inside the load compartment so

you don't have to open the rear doors to fold the seats. The through-loading hatch means you can carry long items such as a golf kit without folding the seats.

The power-operated tailgate has a hands-free function, so if your hands are full you don't have to put down what you're carrying to open it. Just move your foot under the rear bumper to automatically open and close the tailgate.

To make your V90 Cross Country even more useful, add extra equipment from our range of load compartment accessories. From dividers that split the load compartment in two, so you can carry two pets (or a pet and luggage), to a steel grille that provides a sturdy barrier between load and passenger compartment, there's an accessory for every occasion.

All-road capability opens up your world.

The V90 Cross Country is a true all-road vehicle, with the technology to take you further. So the limits of your adventure don't have to be defined by the limits of your car.

Our sophisticated fifth-generation all-wheel-drive system keeps the V90 Cross Country moving when roads get rough or conditions deteriorate. It automatically sends the right amount of power to the wheels that need it the most, so when the road runs out you can keep going. With its increased

ground clearance (210 mm) and large wheels, this car has the capability to take you wherever you want to go. Descending steep hills is made straightforward with Hill Descent Control, which carefully applies the brakes to keep the car from moving too quickly or sliding.

You can tailor the way the V90 Cross Country behaves off-road by selecting Off-road mode from the Drive Mode menu. It makes the car easier to drive on difficult

surfaces such as wet grass, mud and loose gravel by changing the way the engine delivers its power and recalibrating the car's drivetrain so you have more control at slower speeds. On uneven ground, the Active chassis with rear air suspension comes into its own, taking bumps and ruts in its stride. When the road becomes a challenge and the weather becomes unpredictable, the V90 Cross Country gets you where you want to go. In comfort.

*"Sensus connects you with
your Volvo and the rest of the world."*

SENSUS

Informed, in control and always up to date.

Sensus has a guiding principle – to make your life easier and more enjoyable, whether it's your comfort, entertainment or navigation requirements. Sensus connects you with your Volvo and the rest of the world. It keeps you informed, entertained and in control of your journey.

Intuitive, easy-to-use controls are a prime feature of Sensus and you will find them on

the large, 9-inch centre display with touch screen. Replacing physical buttons with virtual equivalents on the screen allows them to be larger and easier to use. Bold, clear graphics make it easy to absorb information at a glance. Our philosophy has always been that you should be able to operate your Volvo and keep your eyes on the road. The head-up display means you can do just that while

staying connected and informed.

The Sensus experience enriches every moment that you spend in your Volvo.

Connecting you with a world of entertainment.

Get closer to the music you love, no matter which seat you're in. With Sensus Connect all of your music is available all of the time, whether it's direct from your favoured media source or streaming from the internet.

It all begins with the 9-inch centre display,

the control centre for Sensus. The surface responds to the lightest of touches – you only need to brush your fingers over the glass to operate the controls. It even works with gloved hands.

Premium Sound by Bowers & Wilkins

gives every occupant a superb audio experience, no matter which seat they are sitting in. Developed with Bowers & Wilkins, creators of high-end audio, this innovative technology brings exceptional clarity and realism to your favourite music. The unique air-ventilated subwoofer delivers richer, deeper bass by drawing air in from outside the car so it can pulse more air through the

speaker. There are 19 speakers, allowing everyone in the car to get the best possible sound, all the time. And you get closer to the performance by using one of the system's three room modes to bring the music to life. Concert mode recreates the unique acoustic experience of the Gothenburg Concert Hall, while Stage and Studio modes put you at the heart of the music, allowing you to hear it as the musicians intended.

SENSUS

9-inch centre display. The focal point of the elegant cabin is the 9-inch centre display with touch screen, which uses a portrait format to give you a large viewable area that means less scrolling. This format is perfectly suited to display maps. It features a glossy black finish that, thanks to a special coating, minimises reflection – so it not only looks beautiful but works beautifully. This is how technology should be.

SENSUS

Get to your destination every time, with ease.

Let Sensus Navigation be your guide, helping you find your destination and keeping you informed. Our sophisticated navigation uses intuitive technology so that wherever you go, you'll get there quickly and easily.

Everything you need to know is shown on the 12-inch driver display right in front of you. The high-resolution image self-adjusts so it's never too bright, automatically resizing the instruments to accommodate navigation information. The head-up display displays all the vital information onto the lower part of the windscreen, projected to look like it is

hovering in front of the car. It means you stay informed without ever having to take your eyes off the road.

Getting to your destination is made even easier with the clear graphics of our maps. Sensus stays one step ahead, guiding you accurately.

With Sensus taking care of the way ahead, you can enjoy the journey.

Voice control. Controlling Sensus is as easy as telling it what to do. Talk to your Volvo, using natural phrases such as "go to industrigatan, Göteborg" or "call Emily Johansson", and voice control will carry out your instructions to operate climate control, navigation, infotainment and your smartphone.

Centre display. The portrait format centre display with touch screen makes reading maps and following navigation prompts beautifully straightforward. Maps appear as they would in an atlas and they scroll less, so you can see where you're going and what's coming next. Its clarity, size and orientation make it the ideal companion for every journey.

"Journeys are more relaxed with IntelliSafe there to help you."

INTELLISAFE

Always looking out for you.

IntelliSafe is our name for the intuitive, intelligent technologies that support your driving, help to prevent accidents and protect you in a collision. This innovative technology plays a key role in helping us to realise our bold vision that, by 2020, no one will be killed or seriously injured in a new Volvo car.

City Safety is at the heart of IntelliSafe. Fitted as standard, it's like a co-pilot that's

looking out for you, detecting danger ahead then warning you and intervening if necessary. City Safety identifies other vehicles, pedestrians, cyclists and large animals ahead of you, even at night. It warns you of any hazards and, if you don't react, it will brake automatically to help avoid or mitigate a collision.

Journeys are more relaxed with IntelliSafe

to support you. Pilot Assist adjusts the steering to help you keep the car centred in its lane and at a constant speed or a set distance from the car in front. Run-off road Mitigation is a world-first that steers and, if necessary, brakes for you to help prevent you leaving the road accidentally.

The power to protect. Hidden behind the striking front end lies an array of safety technology that helps to make driving safer and easier.

INTELLISAFE

With Pilot Assist, your Volvo makes your journey easier and more relaxing. Pilot Assist helps keep your Volvo at a set speed or a set distance from other vehicles and, at speeds of up to 130km/h, it helps keep the car in the centre of the lane by making small adjustments to the steering.

At differences in speed up to 50km/h, City Safety helps to prevent you from colliding with the vehicle in front by braking if you don't, should it detect that an impact is imminent. At higher speeds, the collision is mitigated.

INTELLISAFE

Perfect parking, every time.

Park Assist Pilot is like having someone park your car for you. It tells you if a parking spot is the right size for your Volvo and then takes over the steering to slot it in. It requires a space just 1.2 times the length of your Volvo, so it can tackle even the tightest of spaces. Engage a gear, accelerate and brake according to the screen prompts and your Volvo will take over the steering completely to manoeuvre your car into the space.

Protecting what's most important.

Protecting you and your passengers has always been our priority at Volvo Cars, and our latest generation of cars does more than ever to keep you safe. From preventive technology that helps you avoid collisions to protective features that cushion the impact of any collision, we will never stop innovating in order to improve your safety.

Your Volvo surrounds you with protective safety. The foundation for our new generation of cars is a very strong passenger compartment that uses a high percentage of ultra high-

strength (boron) steel to create a protective cage around you and your passengers.

Volvo Cars gave the world the three-point safety belt in 1959 and our latest developments continue this commitment to life-saving inventions. Run-off Road Mitigation is an emergency system which intervenes with steering inputs and brakes if it detects you are about to come off the road.

Should your car leave the road, Run-off Road Protection technology reduces your chances of suffering serious injury. Prepared

front safety belts automatically tighten when the car senses that an impact is imminent, ensuring that you and your passengers are in the safest position if a collision occurs. Our unique energy-absorbing seats also help to protect your spine in the event of a hard landing should the car become airborne.

It's this range of safety technologies and attention to detail that makes your Volvo a safe place to be.

Volvo is synonymous with road safety. We put our first safety cage into production in 1944, and created the three-point safety belt back in 1959. And we're still innovating today. Prepared front safety belts tighten automatically if the car detects that a collision is likely, to ensure you're in the safest position should one occur.

The sculpted front seats are more than just beautiful to look at. Their unique structure helps to absorb vertical impacts, helping to protect your spine if the car lands heavily after leaving the road or becoming airborne. It's another example of how we make every part of a Volvo work harder for your safety.

"Balancing performance and efficiency, every Volvo powertrain gives you on-demand power with low fuel consumption and emissions."

DRIVE-E

Enjoying more, using less.

With the perfect balance between performance and efficiency, every Volvo engine gives you on-demand power with low fuel consumption. We achieve this with Drive-E, the cutting-edge technology behind every one of our advanced petrol and diesel engines, where performance and efficiency are built in.

It's our innovative culture that enables us to create such engines. The D5 powertrain features PowerPulse, a Volvo Cars world-first. It activates the turbocharger as soon as you press the accelerator to give an instant boost of acceleration from standstill and at lower speeds. Technology such as this enables us to offer the power of a much larger engine from a compact four-cylinder, so you get the perfect mix of power and efficiency.

Smaller engines lose less energy through friction so they can make every drop of fuel work harder to minimise emissions. We've

used low-friction components to make them run smoother and more efficiently. Reducing size and weight has freed up interior space and improved the car's handling.

Precise manual transmissions and our eight-speed Geartronic™ automatic gearbox make the most of each engine's potential. Designed to minimise power loss and maximise performance, Geartronic™ will always select the right gear for whatever is coming next, or you can choose to change gear yourself in manual mode.

To help you drive more efficiently, select Eco mode and the V90 Cross Country recalibrates the drivetrain for the lowest possible fuel consumption and emissions. The coast function disconnects the engine from the automatic transmission when you release the accelerator at speeds above 65km/h, so it isn't being used to slow the car.

Our diesels are quiet and smooth for a relaxing journey, thanks to ground-breaking i-ART injection technology. By precisely metering exactly the right amount of fuel for each cylinder, i-ART helps the engine run more smoothly while using less fuel. And the technology ensures it stays that way for the car's lifetime. You will always benefit from low fuel consumption.

At Volvo Cars, by looking to the future we enhance your life today. Drive-E brings together advanced technologies to give you efficiency, performance and range – and a better drive for you.

Driven to perfection.

We designed the V90 Cross Country from the ground up for all-road capability and on-road precision. That's why the sophisticated suspension gives you the best of both worlds. Accuracy and precision when you want it, with the technology to keep you moving when conditions are bad.

Double wishbone front suspension works in harmony with integral axle rear suspension to give you precise control over the car. Rear air suspension compensates for loads, while adapting to the road and driving conditions for an even better ride. Advanced driver aids such as Electronic Stability Control and Understeer Control Logic keep the V90 Cross Country stable, contributing to the way it handles corners. The Cross Country suspension and larger wheels create additional ground clearance, and all-wheel drive gives you the edge on demanding roads and in challenging conditions.

Choose between four drive modes that allow you to tailor the car's behaviour to your mood and find the perfect setting for the road you're on. Select Off-road mode and Hill Descent Control is automatically turned on, helping you negotiate steep downward slopes.

Altering the engine, gearbox, accelerator and steering response changes the way the car behaves and, with the Active Chassis with rear air suspension, how it rides and handles.

And when you come to a stop, the V90 Cross Country helps you to get going again. Hill Start Assist makes pulling away on an incline effortless by holding the car on the brake until you press the accelerator. Auto Hold keeps the brakes on after you've released the pedal, so you can let the car do all the work in stationary traffic.

Discover superior comfort and handling created by rear air suspension. It soaks up poor road surfaces and keeps the ride height constant so the car responds how you want it to. Active Chassis technology allows you to customise the way the V90 Cross Country rides and handles.

Your Volvo, the way you want it.

Enhance the rugged looks of the V90 Cross Country and express your individuality by choosing our exterior styling package, or select individual components as accessories for increased style and presence.

Side scuff plates in stainless steel, embossed with the Cross Country logo, match the standard front and rear sillmoulding. Integrated dual split tail pipes create a more tailored look. Choose our 20-inch five spoke Matt Black/Diamond

Cut or 21-inch seven spoke Matt Tech Black/Diamond Cut alloy wheels, both only available for the V90 Cross Country, with their diamond cut finishes in matt black and grey.

1. Volvo designed roof box. 2. Load carriers. 3. Bumper cover.

Get more from life.

Add to the inherent practicality of the V90 Cross Country with a range of exterior accessories from Volvo Cars, which are designed to look good and work flawlessly. Made from tough, high-quality materials they're built to withstand the punishment inflicted under any weather condition.

Take advantage of our range of roof-mounted accessories by adding a pair of tough, low-profile load carriers. Easy to fit – they clip onto the car's roof rails – they instantly allow you to fit our load carrier accessories, from the ski rack to the canoe and kayak holder.

Our lightweight, stylish roof box fits straight onto the load carriers, adding 350 litres to the carrying capacity. Ideally suited to carrying skis (and capable of carrying up to six pairs) its low weight and quick grip mountings make it possible to fit with one hand. Neat touches such as LED lighting in the lid, to help you load in the dark, make the roof box indispensable if you have lots to carry.

The bumper cover protects the paintwork from damage caused by loading objects into the boot. Made from stainless steel with a high gloss finish, the cover looks great and works well.

1. Protective steel grille. Load compartment divider. Dog gate. Load liner. 2. Load compartment mat, plastic. 3. Illuminated load scuff plate. 4. Mud flaps, front. 5. Semi-electrical foldable towbar.

6. Load compartment dirt cover, fully covering. 7. Load compartment mat, reversible and foldable.

Make your life easier with accessories that extend the built-in versatility of the V90 Cross Country and protect the car's interior.

A steel grille provides a sturdy barrier between the load and passenger compartments. The load compartment divider splits the boot in two so you can carry a pet and luggage, and a dog gate creates a secure compartment to keep pets safe.

Keep the interior of your V90 Cross Country immaculate with our load compart-

ment covers, including a tough plastic mat, a dirt cover that protects the entire load compartment (and folds out to protect the bumper too) and a reversible, foldable mat with fabric on one side and plastic on the other. An illuminated tailgate scuff plate covers the load sill.

In addition, the electrically folding towbar gives you the ability to tow without the inconvenience of a fixed towbar. Press a button in the boot and the towbar slides out

from under the car – all you have to do is lock it into position with one click. And, with the electrical socket integrated into the towbar's neck, it's unobtrusive and compact.

A set of Volvo-designed mudflaps deflects road grime and dirt from the car's bodywork and reduces the effects of spray on following traffic. Made from soft plastic, they are tough enough to withstand everyday use and flexible enough to bend but not break.

7. 20" 5-Double Spoke Matt Black/Diamond Cut. 8. 21" 7-Open Spoke Matt Tech Black/Diamond Cut. 9. See more lifestyle accessories at collection.volvocars.com

Create a V90 Cross Country that complements your life. The sleek iPad® holder allows rear-seat passengers to watch, read or play and has two USB ports for charging devices. The remote control can be personalised to match or contrast your car's interior trim with different exterior casings.

Our new child seats combine comfort with state-of-the-art-safety and are designed to fit perfectly into your Volvo.

Made from Wooltextile cloth, which is 80 per cent wool, they're durable and tough but also soft and breathable, so your children stay comfortable and safe.

At Volvo Cars we apply the same stringent standards to our child seats as we do to building our cars, so you know your children are well protected. They are the result of more than half a century of hard work, continuous testing and meticulous

research. Our new range of rearward-facing child seats gives the best possible protection for your children, and our booster seats mean that we continue to keep them safe as they grow up.

1. iPad® holder, rear seat. 2. Personalised remote control shell. 3. Child seat, booster cushion and backrest. 4. Child seat, booster seat. 5. Child seat, rearward facing. 6. Child seat, infant seat.

Service by Volvo. A simpler way.

When you buy a Volvo, you buy the simplest way to have a car. No matter what your car may need, your authorised Volvo workshop will take care of it for you and make sure that your Volvo stays in tip-top shape.

We have our own approach to service that's personal, efficient, and which takes care of you as well as it takes care of your car. We call it Service by Volvo and it will provide everything you need in the

simplest way possible.

Your Volvo Cars dealer offers a whole range of simplifying services all designed around you, ensuring you a carefree ownership experience. Still, this is just the beginning. Soon, you will also get a Personal Service Technician, your car will be ready within the hour and you can relax in our lounge instead of driving back and forth. It's because everything we do is about finding new ways to make life simpler for people,

with our cars as well as our service.

Maintenance service

When you bring your Volvo in for maintenance service at the authorised Volvo Car workshop, a lot of extras are included to make your visit more convenient and rewarding. We update your car's software to the latest version, which means that your Volvo can become a little bit better at every service.
